Kanazawa University, Graduate School of Natural Science and Technology

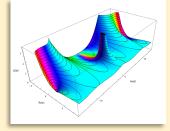

## **Mathematical and**

Division o

# **Physical Sciences**

We welcome international students who want to study with us!

**Mathematics Research** 

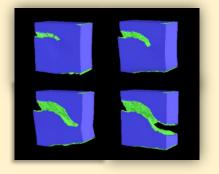

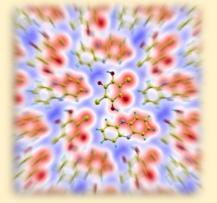

Investigating the mysteries of the world through the magic of numbers.

#### **Applied Mathematics** Research

**Applied Mathematics connects mathematics** and interdisciplinary fields such as natural science, engineering, and economics.

#### **Computational Science** Research

Computer simulation arose as the third research method following theory and experiment, and it benefitted the industrial world, particularly the field of state-of-the-art technology.

### **Physics Research**

Exploring all kinds of phenomena in the universe to unveil the secrets behind them.
